PROFESSIONAL SUMMARY

AI Engineer with strong CS fundamentals (IIT (ISM) Dhanbad) and production experience building LLM and vector-database systems. At Reliance, designed a RAG framework over 120+ tables with embedding-based semantic retrieval that routes natural-language prompts to the right data source - directly analogous to LLM-assisted literature review, data search, and code generation. Hands-on with transformers, embedding models, PyTorch, and Hugging Face; trained and evaluated models on a 10,000,000+ row dataset. Comfortable deploying AI in production with attention to robustness and bias. Portfolio: portfolio-eight-coral-tabh47k4e7.vercel.app

WORK EXPERIENCE

Reliance Industries Ltd.

Aug 2025 - Present

Graduate Engineer Trainee (Data / AI Engineer) - Mumbai, India

- **LLM + Vector-DB Retrieval System** - Designed a RAG framework over 120+ tables across 9 spaces using embeddings and vector retrieval, scaling Databricks Genie past its 30-table limit.
- **Semantic Query Routing** - Built retrieval pipelines over table and column metadata to dynamically route prompts to the right source - applicable to data-search and research workflows.
- **Production Deployment** - Deployed an OAuth-secured external web application for conversational LLM access, integrating with existing data infrastructure.
- **Real-Time Data Feeds** - Built ADF pipelines with 15-minute refresh cycles, handling continuously updating data at scale.
