GORRE DINESH CHANDAN REDDY

7416767453 — gorredinesh21@gmail.com — GitHub — Portfolio

Education

Indian Institute of Technology (ISM), Dhanbad
Dec 2021 – May 2025
Bachelor of Technology in Computer Science and Engineering — *Dhanbad, India*

- **Relevant Coursework:** DSA, OOP, DBMS, Software Engineering, Computer Networks, Deep Learning

Experience

Reliance Industries Ltd.
Aug 2025 – Present
Graduate Engineer Trainee (Data / AI Engineer) — *Mumbai, India*

- **Talk-to-Genie Platform** — Built an external web application integrating Databricks Genie using OAuth-based authentication, enabling secure access outside Databricks with conversational interaction support.
- **Unified Genie Architecture** — Designed a scalable RAG framework overcoming Databricks Genie's **30-table limitation** by organizing **120+ tables** across **9 Genie spaces**.
- **Intelligent Query Routing Engine** — Built semantic retrieval pipelines using table and column metadata to dynamically route prompts to relevant Genie spaces.
- **Near Real-Time Data Pipeline** — Built ADF ingestion pipelines supporting **15-minute refresh cycles** with Landing → Bronze → Silver transformations.

Projects

GAN-Based Data Augmentation for Imbalanced Datasets | Python, PyTorch, GANs, XGBoost, LightGBM | GitHub

- **Custom GAN Architecture** — Designed Generator ($128 \to 256 \to 512$, Tanh) and Discriminator ($512 \to 256 \to 128 \to 1$) networks with Xavier initialization, LeakyReLU activations and BatchNorm for stable tabular GAN training.
- **Synthetic Data Generation Pipeline** — Built an end-to-end augmentation framework using a custom GAN and SMOTE to address class imbalance in tabular datasets, using a credit-card dataset (10,000,000+ data points) as the use case.
- **Multi-Model Training Framework** — Trained Random Forest, XGBoost, LightGBM and Gradient Boosting on real vs. real+augmented data using 5-fold cross-validation.
- **Performance Improvement** — Brought False Negatives down to just 9 on a 10,000,000+ row dataset; recall increased from 0.91 to 0.99.

Tinder AI Coach | Python, FastAPI, LangChain, Google Gemini, Hugging Face, Ollama | GitHub

- **Multimodal Photo Analysis** — Integrated Google Gemini (gemini-2.5-flash) to analyze profile images and return actionable feedback on composition, presentation, lighting, background and photo selection.
- **Web-Based Profile Automation** — Built a FastAPI service that standardizes and optimizes user inputs and writes them back to the live account.
- **Knowledge Base Grounding** — Web-scraped and curated a domain knowledge base to ground the coach's advice in local context.

CareerOS | Python, Flask, SQLite, LangChain, LangGraph | GitHub

- **Multi-Agent LLM Workflow** — Built a multi-agent platform that extracts job postings, scores candidate fit, and generates a tailored resume per posting from its description.
- **AI Job Discovery Engine** — Extracted postings from LinkedIn, Indeed and Telegram with an interactive analytics and resume-generation dashboard.

Technical Skills

ML and DL: Deep Learning, Machine Learning, Transformers, BERT, GANs, CNN, LSTMs, NLP, Computer Vision, Transfer Learning, XAI, Model Evaluation, Fine-tuning, TensorFlow, PyTorch, Keras, MLOps

Gen AI: LangChain, LangGraph, RAG, Agentic AI, MCP, Hugging Face, Ollama, FAISS, ChromaDB, FastAPI

Programming Languages / Databases: Python, SQL, PostgreSQL, C++, C

Deployment / Data: AWS, Databricks, PySpark, ADF, ADLS Gen2, Apache Spark, ETL, Docker

Achievements

- Secured AIR **2903** in JEE Advanced and AIR **4616** in JEE Mains
- Ranked among **Top 200 teams out of 18,500+ teams** in Amazon ML Challenge
- Participated in Hackfest'23 organized at IIT Dhanbad
