PROFESSIONAL SUMMARY

AI Engineer building **agentic systems and full-stack LLM-powered applications** end to end - from data sources through backend services to user-facing apps. ~1 year shipping production GenAI at Reliance, including a **RAG framework with semantic query routing** that scaled Databricks Genie past its 30-table limit to 120+ tables across 9 spaces, plus a **multi-agent LangGraph orchestration workflow** (CareerOS). IIT (ISM) Dhanbad CSE graduate skilled in LangChain/LangGraph, RAG/embeddings, FastAPI/Flask backends, and data pipelines on Azure.

CORE COMPETENCIES

Agentic Systems & Multi-Agent Workflows | Orchestration Pipelines (LangGraph) | LLM-Powered Applications | RAG, Embeddings & Retrieval | Backend Services (FastAPI / Flask) | Prompting Strategies | Data Pipelines & SQL | Python & Cloud (Azure / AWS)

WORK EXPERIENCE

Reliance Industries Ltd.

Aug 2025 - Present

Graduate Engineer Trainee (Data / AI Engineer) - Mumbai, India

- **Unified Genie RAG Architecture** - Designed a scalable **RAG framework with embeddings-based retrieval** that broke Databricks Genie's 30-table limit, organizing 120+ tables across 9 spaces; space-partitioned retrieval improved routing **accuracy** and controlled retrieval **cost**.
- **Intelligent Query Routing Engine** - Built semantic retrieval pipelines over table/column metadata to dynamically route prompts to the right Genie space, tuning **prompting strategies, retrieval accuracy, and latency**.
- **Talk-to-Genie LLM Application** - Built a full-stack, user-facing web app integrating Databricks Genie via OAuth, enabling secure conversational access to the LLM-powered system outside Databricks.
- **Lightweight Data Pipelines** - Built near-real-time ADF ingestion pipelines on Azure (15-min refresh, Landing to Bronze to Silver) to transform and prepare structured data for AI use cases.

PROJECTS

CareerOS - Multi-Agent LLM Workflow

Built an end-to-end **agentic system on LangChain/LangGraph** that orchestrates multiple LLM agents to extract job postings (LinkedIn, Indeed, Telegram), score fit probability, and generate tailored resumes per job description. Backed by a **Flask backend** and an interactive dashboard with analytics, workflow execution, and downloadable resume generation.

Python, Flask, SQLite, LangChain, LangGraph | github.com/gorredinesh21/JOB_APPLICATION_HANDLER-

Tinder AI Coach - Full-Stack LLM App

Built a **FastAPI backend** and dashboard where users manage and optimize their entire profile from one place; integrated Google **Gemini** for multimodal photo analysis and a web-scraped India-context **RAG knowledge base** that grounds the coach's advice, writing optimized profiles back to the live account.

Python, FastAPI, LangChain, Google Gemini, Hugging Face, Ollama | github.com/gorredinesh21/TINDER_MCP_AI

GAN-Based Data Augmentation for Imbalanced Datasets

Built a synthetic-data pipeline using a custom GAN and SMOTE to address class imbalance on a 10M+ row dataset; trained XGBoost, LightGBM, Random Forest and Gradient Boosting with 5-fold CV, improving recall from 0.91 to 0.99 and cutting false negatives to 9.

Python, PyTorch, GANs, XGBoost, LightGBM | github.com/gorredinesh21/FINAL_YEAR_PROJECT

EDUCATION

B.Tech, Computer Science and Engineering - Indian Institute of Technology (ISM), Dhanbad

Dec 2021 - May 2025

Relevant coursework: Data Structures & Algorithms, OOP, DBMS, Software Engineering, Computer Networks, Deep Learning. AIR 2903 JEE Advanced; Top 200 / 18,500+ teams, Amazon ML Challenge.

SKILLS

Generative AI & Agentic: LangChain, LangGraph, Agentic AI, Multi-Agent Workflows, RAG, Embeddings, FAISS, ChromaDB, Prompting, Fine-tuning, MCP, Google Gemini, Hugging Face, Ollama

Backend & APIs: FastAPI, Flask, REST APIs, Microservices

Languages / Databases: Python, SQL, PostgreSQL, C++, C

Data Engineering & Cloud: Databricks, PySpark, Apache Spark, ADF, ADLS Gen2, ETL, Data Warehousing, Azure, AWS

ML / DL: Machine Learning, Deep Learning, NLP, Transformers, BERT, CNNs, LSTMs, GANs, TensorFlow, PyTorch, Keras, MLOps
